

## Safe mode settings

When you opt in to Safety Mode, videos with mature content or that have been age restricted will not show up in video search, related videos, playlists, shows and movies.

1. Simply go to the bottom of any page on YouTube™ and click the grey 'Safety' button to open the preference setting.

2. Choose to turn Safety Mode 'on' or 'off' and click on Save.

If you turn it on and you have a YouTube™/ Google account, you can sign in to your account and lock Safety Mode so that no-one else can change the settings whenever YouTube™ is accessed from that browser.
