

Communication and Interaction Ideas

Support me to continue to use my amazing communication skills. This may include modelling how I can interact with other people using good listening and good speaking, using my good manners (saying please and thank you), speaking slower so my words are clearer or using longer sentences to tell you more information (adding because to the sentence to make it more interesting)

Independence Ideas

Encourage me to do as many tasks as I can as independently as I can. In school this includes things like: Dressing myself, washing my hands correctly, feeding myself using cutlery, washing the pots, making a simple snack (such as some toast or a sandwich), carrying out tasks where I have to process instructions (go to the cupboard and get a new toilet roll and take it to the bathroom)

Social, Emotional and Mental Health Ideas

Remember this is a tricky time for all of us. It is important that we do all we can to remain happy. Encourage me to share my feelings with you; help me to understand what these feelings are if I do not know (e.g you are feeling grumpy/frustrated/upset right now...). Support me to do the things which make me feel safe and secure; build a den with me, watch my favourite tv show or film (with a bag of popcorn if you can!)

Optional Home Learning!

Purple Class:

Please feel free to use these ideas to keep learning going at home! There is no pressure to complete these...you may have other ideas and routines that you wish to maintain.

It would also be amazing to see or hear about what you've been getting up to so please feel free to share photos/work on our Twitter page: @KelfordSchool or you could put together a photo book to show us when we all come back! Please let us know if you need anything to help and we will try our very best.

Thank you all for all your hard work and support during these uncertain times. We miss you all!

Cognition and Learning Ideas

Support me to build on what I already know.

If I know my numbers to ten or twenty then work to deepen my understanding; can I find the number that is one more or one less? Can I match these numbers to their same amount. Can I find different ways to make an amount (e.g. 5).

If I know my letter sounds can I use these to blend words when I read (e.g. d-o-g, f-i-sh, n-igh-t) and to write a simple sentence (I can see a green car).

Sensory/Physical Ideas

Support me to engage in the sensory play activities that I like. This could include exploring cornflour goo, having chance to play with water or exploring sand.

Encourage my fine motor skills; I could thread cheerios onto string/wool to make a bird feeder, stack objects or take part in dough disco.

Encourage me to use my gross motor skills; can I run, jump, hop, ride my bike or scooter, can I climb and explore (safely)? Set me an obstacle course so I can practice all of these skills
